Chief Residents and Residency Program Directors

On April 5, 2002, the Office of Health Policy and Clinical Outcomes will host the second in a two-part series titled Chief Resident Education for Success Training (CREST). The all-day session is designed for chief residents who are completing their residency tenure and will cover timely, practical issues related to the physician's self-development, including leadership roles for physicians, medical/legal issues, the landscape of practice, and life after residency. Leadership training for new chief residents is scheduled for June 6 and 7, 2002 and will provide participants with tools and experiences that will better equip them to lead and manage groups in complex organizations. Workshops will address concepts of leadership motivation, time management, group management, conflict management, and teaching skills.

Registration is complimentary. For more information, please contact the Office of Health Policy and Clinical Outcomes at 215-955-6969.
